The Programs Committee will consider Quarter changes to programs if the programs can show it is in the best interest of the University as a whole.

The following changes are in the best interest of the University. Since there will not be a change of catalogs until Semesters, the Registrar's office would like to propose that a new major code tagged to the new degree change is created and students will have to fill out paperwork to move into that code, otherwise they will graduate under the old code. The change will be in Fall 2011. At the Graduate level name changes will have to go RAGGS in the form of a notification for expedited review. Discussion followed. The Programs requesting the changes will outline a plan for processing the students through the degrees.
